

Compound: Amitriptyline in FoamaDerm

Ingredients:

| Ingredient | Quantity |
|---------------|--------------------------|
| Amitriptyline | Less than or equal to 2% |
| FoamaDerm | qs to 100 g |

Tools and Equipment:

1. Spatula
2. Analytical balance

Directions:

1. Weigh amitriptyline and add to the FoamaDerm bottle. There is no need for any solvent.
2. Close the cap and gently tap/swirl the container. There is no need for continuous or vigorous shaking.
3. A clear liquid will be formed within 15-20 minutes.
4. Foam will be dispensed upon pressing the actuator.

Notes:

- Use proper PPE, work under fume hood.
- Equipment should be cleaned with isopropyl alcohol 70% to reduce the chance of bacterial or fungal contamination.
- The percentage drug concentration is on a weight/weight basis.

Packaging: FoamaDerm original bottle

Label: For External Use Only, Store at Room Temperature

Storage/BUD: 3 months room temperature
